

Business Intelligence

Leading Business Intelligence integrator and Cognos partner

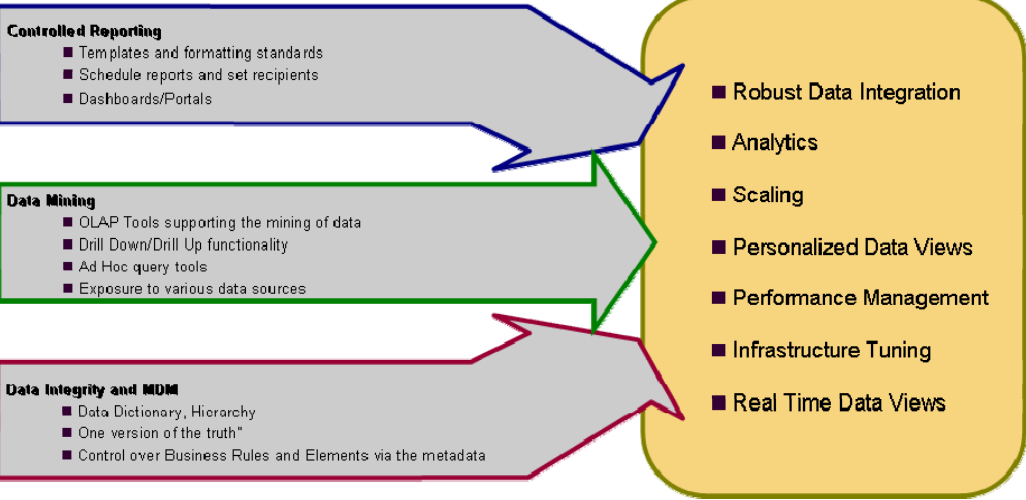

Founded in 1990, GalaxE.Solutions®, Inc. (GalaxE), is an industry leader in designing and deploying business processes and supporting systems that enable clients to transact and share information across internal networks and the Internet, targeting business results, competitiveness and efficiency.

Business Intelligence (BI) refers to applications and technologies that are used to gather, provide access to, and analyze information about a company's operations. Business Intelligence systems can help companies have a more comprehensive knowledge of the factors affecting their business, such as metrics on sales, production and internal operations. As a result of this, companies make better business decisions.

Today, organizations see that data and content are inseparable aspects of information management and should be managed in an integrated enterprise-centric approach. Enterprise information management brings Business Intelligence and enterprise content management together.

GalaxE is an experienced Business Intelligence integrator and is a partner of Cognos, the leading Business Intelligence, planning and scorecarding software solution. GalaxE's methods and approaches for Business Intelligence integration includes Controlled Reporting, Data Mining, Data Integrity and MDM, Robust Data Integration, Analytics, Scaling, Personalized Data Views, Performance Management, Infrastructure Tuning, and Real Time Data Views.

For more information about GalaxE's Business Intelligence and professional services expertise and how they can help your business today, please contact Tore Carlson at 732-868-0400 x221, or e-mail, tcarlson@galaxesolutions.com.
