Galaxy's reputation for rapid delivery of quality technical expertise and IT solutions has earned it preferred vendor status with high profile clients in the financial, pharmaceutical, retail, and communications sectors, as well as many emerging technology companies.

Job Title [PEGA CoE – Director](#)

Location United States – Detroit, MI – Somerset, NJ

Position Type Full-time

Job Description Pega:
Pegasystems provides a rules-driven Business Process Management (BPM) suite intended to help businesses plan, build, and manage processes through their entire lifecycle. Pegasystems SmartBPM blends process and practice rules to rapidly deploy and update solutions in response to changing circumstances. The foundation of the SmartBPM Suite is PegaRULES, Pegasystems' business rules engine that delivers dynamic and situation rule resolution to manage and optimize everyday business processes.

Qualifications

- 4+ years experience using the PegaRULES Process Commander
- Hands On experience with SOA architectures
- At least 6-8 clear projects implemented in Pega
- Experience in Designing and Implementing Process Flows
- Eclipse/WSAD/Rational Application Developer experience
- Development of a Security design living within a portal environment and integrating within a PRPC application
- Must be able to define and play an active role in Architecture Governance
- Have an advanced understanding of the main features of PRPC; their features and limitations
- Ability to translate Use Cases to Pega implementation
- Ability to quickly prototype mockups for approval by the client
- Ability to Visualize, design and validate User Interfaces

Soft Skills:

-Ability to interact with Business Analysts to elaborate Use Cases

- Good communication skills
- Ability to convey information on the phone using well prepared documents

Nice to haves:

- Past experience in designing applications using Object Oriented approach, preferably Java/ Websphere
- Health Care industry experience is a big +
- Experience in Portal technologies

Certifications:

- Certified Pega PRPC Lead System Architect or Sr. System Architect exam certification

Responsibilities

Represent GalaxE.Solutions as the lead champion for Pega -

- Creating and maintaining architectural standards
- Superior knowledge of Pegasystems capabilities with key Healthcare industry needs
- Be the "Client Advisor" with senior executives at the client providing BPM solutions and capabilities
- Domain expertise in the industry with knowledge of strategic consulting experience / Large Systems Integration experience
- Centralizing and formalizing the housing and reuse of business-configurable assets
- Promoting standard methodologies, tools and education
- Architecture and Design expertise
- Operational walkthrough and end-to-end review, including identification of process improvements and ROI
- Impact analysis review, identifying execution gaps and automated solutions, plus IT and business sizing
- Project initiation training, including both BPM and Pega training
- Application profile, high level use case requirements and reusable asset review
- Project setup and design review, including identifying assets leveraged from other projects, functionality specifications and a design compliance review
- Environment build-out, including generating a base framework
- Scrum sessions, which equips the project team to complete use cases on their own
- Direct capture of objectives to elaborate use cases, design specifications and traceability matrix; this is specifically assisted by the Pega application
- Identification of reusable assets, then harvesting those assets and making them available for reuse by other projects
