GalaxE.Solutions Completes Business Alliance Agreement With Informatica to Provide Groundbreaking Master Data Management (MDM) Technology Solutions

SOMERSET, N.J., Oct 25, 2010 /PRNewswire via COMTEX/ -- GalaxE.Solutions, Inc., a leading IT company specializing in the design and implementation of custom software solutions, has completed a Business Alliance agreement with Informatica, the world's number one provider of data integration software and an innovator in Master Data Management (MDM). The announcement was made by Tim Bryan, Chairman and CEO of GalaxE.Solutions.

The partnership will allow GalaxE to apply the leading edge Informatica technology suite to large scale Master Data Management initiatives to work conducted on behalf of its clients, aimed at eliminating duplication of data and, in turn, cutting costs and increasing overall efficiencies. This will include projects executed in GalaxE's new Detroit software development facility; particularly in support of its health care practice.

"As healthcare data systems are rewritten and applications are being changed and replaced, MDM plays into our strengths, as custom software architects and experts, of successfully moving data across systems not originally designed to communicate," said Bryan. "MDM allows us to effectively centralize that information and provide a single version of the truth - ensuring quality, consistency and efficient data reconciliation."

Master Data Management comprises a set of processes and tools that consistently defines and manages the non-transactional data entities of an organization (which may include reference data). MDM has the objective of providing processes for collecting, aggregating, matching, consolidating, quality-assuring, persisting and distributing such data throughout an organization to ensure consistency and control in the ongoing maintenance and application use of this information.

Added Sandipan Gangopadhyay, President of GalaxE.Solutions: "This partnership is a logical progression to our work with Siperian in implementing key revolutionary capabilities for leading healthcare organizations globally. Jointly, we successfully managed the complex lifecycle of data entities through master data management, coupled with highly ergonomic and efficient web 2.0 and secure services interfaces. We are excited at the next level of capabilities represented by

Informatica, through its merger with Siperian earlier this year, and look forward to leveraging Informatica's strengths in data integration, data quality and MDM."

About GalaxE.Solutions

GalaxE.Solutions, Inc., is a leading provider of software services and IT business support systems. With over 20 years of experience in the healthcare, retail, and financial industries, the company facilitates the secure sharing of critical information across internal networks and over the Internet to improve client competitiveness, efficiency, and business results.
